Inpatient/Outpatient
Palliative Care
Pharmacy Specialist

Michelle Schmidt,
PharmD, BCGP
Inpatient Palliative Care
Pharmacy Specialist

Current Resident

Marianne Carter, PharmD
Interests: Palliative Care, Oncology

“I chose the University of Iowa's Palliative Care and Pain Management PGY2 program because of the wide variety of inpatient and outpatient rotation experiences in multiple specialties, both in palliative care and other disciplines. The entire residency team has been so flexible with my schedule design and never hesitates to foster my personal practice interests, whether in the form of projects, lecture opportunities, or rotations. Each preceptor this year has challenged me to be an independent, well-rounded practitioner with critical thinking and self-care skills. Iowa City is also a wonderful place to live and work with many restaurants and breweries, outdoor activities, and art and culture offerings to explore!”

Former Residents

**Sarah Hannig,
PharmD, BCPS**

Adjunct Clinical Assistant Professor
University of Iowa College of
Pharmacy
2020 – 2021

**Theodore Nguyen,
PharmD, BCPS**

Clinical Pharmacist
Los Angeles County
Department of Mental Health
2019 – 2020

**Jennifer Ku,
PharmD, BCPS**

Palliative Care Pharmacist
MedStar Georgetown University
Hospital
2018 – 2019

**Eva Coulson,
PharmD, BCPS**

Pain & Oncology
Pharmacist
Kaweah Delta Medical Center
2017 – 2018

Former Residents

“The program at Iowa, unlike other PGY2 residencies, provides multiple rotations in both palliative care and pain management across different practice settings with robust interprofessional teams. It's a great learning environment for those not yet decided on a particular track or hoping to be a well-rounded clinician while exposing you to gold standards of practice like music therapy for anxiety, legacy work for end-of-life patients, and biofeedback therapy with a pain psychologist for chronic pain. Furthermore, the faculty focused on fostering critical problem solving - a useful skill when practicing in an area with limited evidence and complex patient cases - as well as the soft skills necessary to promote career longevity or to navigate the administrative and cultural challenges in establishing your own clinical pharmacy service. The biggest factor that led me to be ‘bold’ with my rankings was the dedication of the faculty and the palliative care team in teaching self-care. It is an aspect of professional practice that is often overlooked and is now considered vital amidst a pandemic. For me, it was hard learning how to prevent burnout but this program made it easier with its compassionate faculty and partnership with the hospice and palliative medicine fellowship.”

Jennifer Ku, PharmD, BCPS

“Going to the University of Iowa PGY2 in Palliative Care and Pain Management was one of the best decisions I've made. I felt this program was very robust in providing a wide array of opportunities in academic experiences, flexibility for progressive pharmacy practices, phenomenal mentorship, and unique experiences/clinical adventures (Pallium India). The beauty of this program is that it is very flexible to what your interests are and where you hope to grow.

One of the key things that drew me to this program was the fact that the pharmacy residency was embedded into the medical fellowship, and it had a comprehensive holistic team dynamic (music therapist, chaplain, social worker, etc). This allowed me to expand my knowledge outside of ‘just pharmacy knowledge’. In addition to the complex pharmacology, I wanted to understand the aspects of physical assessments, medical procedures, psychosocial issues, and spiritual concerns. This program really has the whole package.”

SOLACE Collaborative

Scholarship

Outreach

Leadership

Advocacy

Compassionate Care

Education

NOW

- Peer-reviewed publications and grants awarded
- Cambia Health Foundation Sojourns Scholar
- Clinical intervention tracking – cost savings

FUTURE

- Expanded regional hospice collaborations
- Palliative Care Certificate for Practicing Pharmacists
- Increasing co-curricular palliative care service opportunities

Life in Iowa City

"Iowa City is big college town mixed with suburbia and nice outskirts of nature. I loved the ability to be immersed with nature: seeing fireflies, going to Kent Park, doing free activities with the Johnson County Conservation, exploring Maquoketa caves, experiencing the full array of seasons. For the foodies, there are several hidden gems (restaurants and ethnic markets) to be found in Iowa City - feel free to ask me about them!"
